

Appl. No. 10/523,866
Amdt. dated June 8, 2009
Reply to Office Action of May 11, 2009

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application. Non-elected claim 53-62 have been canceled. No new matter has been added.

Listing of Claims:

Claims 1- 31 (canceled).

Claim 32 (previously presented): A label sheet construction, comprising:

- a facestock layer;
- a first weakened line pattern in the facestock layer and defining at least a portion of a perimeter of a reply mailing address label; and
- a second weakened line pattern in the facestock layer, outside of the first weakened line pattern and defining at least a portion of a perimeter of a send-reply mailing address label.

Claim 33 (previously presented): The label sheet construction of claim 32 wherein the facestock layer has first means within the first weakened line pattern for receiving send mailing address indicia from a printer or copier so that the reply and send-reply mailing address labels are thereby in mailing-address printed conditions.

Claim 34 (previously presented): The label sheet construction of claim 33 wherein the first means includes a print-receptive coating of the facestock layer.

Claim 35 (previously presented): The label sheet construction of claim 33 further comprising second means for adhering the send-reply mailing address label in a send-mailing-address-label position on a mailing article with the send-reply mailing address label in the mailing-address printed condition and the send-reply mailing address label in a removed condition relative to the label sheet construction.

Claim 36 (previously presented): The label sheet construction of claim 35 further comprising third means for allowing the reply mailing address label to be removed out of and off of the send-reply mailing address label.

Claim 37 (previously presented): The label sheet construction of claim 36 further comprising a release liner attached to the facestock layer.

Claim 38 (previously presented): The label sheet construction of claim 37 wherein the second means is between a portion of the release liner and a portion of the send-reply mailing address label before the send-reply mailing address label is the removed condition.

Claim 39 (previously presented): The label sheet construction of claim 38 wherein the second means includes pressure-sensitive adhesive.

Claim 40 (previously presented): The label sheet construction of claim 39 wherein the pressure-sensitive adhesive is on a bottom surface of the send-reply mailing address label.

Claim 41 (previously presented): The label sheet construction of claim 37 wherein the release liner has a weakened line therein disposed generally outside of the reply mailing address label and inside of the send-reply mailing address label to form a release liner member.

Claim 42 (previously presented): The label sheet construction of claim 41 wherein the release liner member forms part of a bottom surface of the send-reply mailing address label when in the removed condition.

Claim 43 (previously presented): The label sheet construction of claim 42 wherein the second means includes adhesive on a bottom surface of the send-reply mailing address label and outside of the release liner member.

Claim 44 (previously presented): The label sheet construction of claim 41 wherein the third means includes the release liner member.

Claim 45 (previously presented): The label sheet construction of claim 37 wherein the second means allows the send-reply mailing address label when in the printed condition to be removed from the facestock sheet construction by separating the send-reply mailing address label along the second weakened line pattern and from an adjacent portion of the facestock sheet construction and from a portion of the release liner.

Claim 46 (previously presented): The label sheet construction of claim 32 wherein the second weakened line pattern comprises a cut line pattern.

Claim 47 (previously presented): The label sheet construction of claim 32 wherein the send-reply mailing address label defines a first send-reply mailing address label, and the reply mailing address label defines a first reply mailing address label; and further comprising a third weakened line pattern in the facestock layer and defining a perimeter of a second reply mailing address label, and a fourth weakened line pattern in the facestock layer, outside of the third weakened line pattern and defining a perimeter of a second send-reply mailing address label.

Claim 48 (previously presented): The label sheet construction of claim 32 wherein the mailing article is an envelope, a periodical or a package.

Claim 49 (previously presented): A label sheet construction, comprising:

- a facestock layer;
- a first weakened line pattern in the facestock layer and defining at least a portion of a perimeter of a send mailing address label; and
- a second weakened line pattern in the facestock layer, outside of the first weakened line pattern and defining at least a portion of a perimeter of a reply-send mailing address label.

Claim 50 (previously presented): The label sheet construction of claim 49 wherein the facestock layer has first means within the first weakened line pattern for receiving reply mailing address

indicia from a printer or copier so that the reply-send and send mailing address labels are thereby in mailing-address printed conditions.

Claim 51 (previously presented): The label sheet construction of claim 50 further comprising second means for adhering the reply-send mailing address label in a reply-address-label position on a mailing article with the reply-send and send mailing address labels in the printed condition and the reply-send mailing address label in a removed condition relative to the label sheet construction.

Claim 52 (previously presented): The label sheet construction of claim 51 further comprising third means for allowing the send mailing address label to be removed out of and off of the reply-send mailing address label.

Claim 53-62 (canceled).
